Illinois Power Agency Updates Energy Workforce Equity Portal Flyer

July 20, 2023

To help facilitate a meaningful participation of Equity Eligible Persons on renewable energy projects supported through certain IPA programs and procurements, the Agency has translated the Energy Workforce Equity Portal flyer into Spanish. As part of the IPA's education and outreach efforts, the Agency recognizes the need for, and importance of, improved accessibility for EEPs who have limited English proficiency. With this translation, the IPA hopes to remove language access barriers for EEPs whose preferred language may not be English.

In addition, the Agency has incorporated a QR code into the flyer to make it more interactive and engaging. The QR code is scannable with the camera of a mobile device, providing users with easy access to the Portal website, energyequity.illinois.gov.

The [updated flyer](#) can be found on the IPA website under [IPA Publications](#) as well as on the [Publications page](#) of the Portal website.
